The first aim is to illustrate the distinctive features for:

**planning,
implementing,
monitoring and
assessing**

**an international “joint” doctoral program

2nd Aim

The second aim is to illustrate

the European/International Joint PhD in Social Representations and Communication

as a visionary prototypical experience with a long history of institutional recognition born in 1993 anticipating 20 years ago the

IDP (Innovative Doctoral Program) model, in the Call: People-ITN-2013 (in which has been evaluated as the best among the 1147 projects submitted with the highest mark 98,8/100 marks), a MSCA action re-labelled as EJD (European Joint Doctorate) in the Call: H2020-MSCA-ITN-2015.

TWO ADMINISTRATIVE PROCEDURAL MODELS

=

TWO INTERNATIONAL DOCTORATE MODELS

**"Decentralized" model
for administrative
procedures**

**"Centralized" model
for administrative procedures**

**Cumulative or Additional Model:
International Doctorate**

=

Sum of various institutions in different countries, each with their own local administrative procedures and didactic organisation of doctorate.

**International mobility as only added value:
a local Ph.D. plus joint certificate for international mobility**

**Integrated Jointly Established
Multilateral doctoral model**

=

A joint International doctorate commits institutions to integrating all phases of planning, implementation and award of a joint diploma: Candidate recruitment, selection, admission, enrollment at the network level is just the first step and is no less important than the training in international settings to earn a joint diploma

ADMINISTRATION and MANAGEMENT

Collaborative Internationalized Doctorate

Joint European/International Doctorate

MANAGEMENT Inter-Institutional Agreement	doctoral programme at home institution co-operating with other doctorates at abroad H.E. institutions on the basis of bilateral or multilateral Inter-Institutional Agreement signed by the Rectors: start-up at different time and diverse history of each doctorate is possible at different collaborating Institutions	institutionalised scientific networks of H.E. institutions (open to collaboration with entrepreneurial partners and research centres) in at least 3 countries. The building-up of the institutionalised network - jointly created through a bottom-up approach brought to the top - is part of the common history of the programme, based on a single multilateral Inter-Institutional Agreement jointly established by all the participating institutions and signed by their Rectors.
management structure	each collaborative doctorate adopts the management structure in agreement with the Regulations at its own Institution (at least a program director and a representative for each collaborating doctorates should be identified)	jointly established management structure (Programme Director, Coordinator, Executive Committee, Recruitment Board, Scientific Supervisory Board, Training staff, International Evaluation Board, Quality control committee, etc.)
infrastructures and facilities	facilities at each individual institution and access clearly stated in the Inter-Institutional agreement	common infrastructure for training and management , also including a common web platform for a worldwide access to information and distant learning
recruitment	de-centralised at each home institution	centralised at network level based on online application process of internationally recruited applicants
admission	de-centralised	centralised at network level
enrolment	de-centralised	centralised at network level
fee policy and grants	de-centralised	centralised at network level
degree	degree awarded by home institution plus Additional Certificate to the Diploma (awarded only by the home institution or jointly awarded by two or more Institutions depending on the nature of their	jointly awarded and recognised at network level (critics of double degree)

The "musts" for establishing

TRAINING

Collaborative Internationalized Doctorate

Joint European/International Doctorate

research environment	collaboration between existing doctoral programs in different institutions	research training integrated structured programme built-up on internationally recognised research institutional networks: access to complementary expertise and collaborative trans-national research teams
joint supervision	main tutor at home institution and co-tutor/s at host institution/s, clearly designated and indicated in the individual training agreement for each research trainee	multiple supervision: at least 1 main tutor and 2 co-tutors belonging to partner institutions in 3 different countries, clearly indicated in the individual
international mobility (both physical and virtual)	compulsory as strategic tool for the joint research training and not a sufficient requirement to obtain the Additional Certificate to the Diploma	compulsory as strategic tool for the joint research training and not a sufficient requirement to obtain the Joint Degree
International Summer Schools Lab Meetings, Joint Labs	not compulsory: courses and didactic activities at home and at host institutions (during the mobility period)	compulsory, due to the integrated and structured nature of the program
language for courses	as available at home and host institutions or as agreed on the basis of shared criteria	jointly established criteria to be clearly indicated in the Inter-Institutional Agreement
language policy for thesis	shared criteria to be clearly indicated in the Inter-Institutional Agreement	jointly established criteria to be clearly indicated in the Inter-Institutional Agreement
format for dissertation	shared criteria to be clearly indicated in the Inter-Institutional Agreement	jointly established criteria to be clearly indicated in the Inter-Institutional Agreement
credits (if any: controversial issue)	not compulsory, however if implemented: E.C.T.S. as system for transfer of learning outcomes	not compulsory, however if implemented: E.C.S. (without T) specifically designed and jointly adopted as system for accumulation rather than for transfer

QUALITY CONTROL and Evaluation

obligations and rights for both research trainees and tutors

System

consistent with the Regulations at home and host institutions and shared dispositions clearly indicated in the Inter-Institutional Agreement

consistent with the Regulations jointly established at network level (including entrepreneurial partners, if any) and clearly indicated in the multilateral Inter-Institutional Agreement

individual training agreement

to be signed by the research trainee, the programme coordinator and the tutors at home and host institutions, including entrepreneurial partners (if any)

to be signed by the research trainee, the network programme coordinator and the tutors at home and host institutions, including entrepreneurial partners (if any)

monitoring process, timeline and evaluation tools

to be established in accordance with the dispositions at the awarding institution and with the individual training agreement for joint supervision

on-going face-to-face and online evaluation of the trainee's progress to be jointly established and implemented at network level, including: timeline, online evaluation tools to be filled by the three tutor to provide feedback on progress reports at least on yearly basis on the personalised web space for each research trainee

Intellectual Property Right

to be detailed in the individual training agreement

to be detailed in the individual training agreement

evaluation of PhD dissertation
International Final Jury

the International Final Jury in accordance with the regulations of the awarding institution, also including at least 1 member of the scientific board of the collaborative doctorates and 1 external internationally recognised expert

Multi-step evaluation process: a) authorisation by the three tutors to defend the thesis in front of the International Final Jury; b) in accordance with the regulations of the joint doctorate, including at least 3 members belonging to the network scientific board and 2 internationally recognised experts from outside the network, designated by the participating universities. The thesis supervisors shall participate in the discussion, but not in the final evaluation.

career development plan

to be encouraged as good practice adopted at each collaborative doctorate

career development plan for career prospect in and outside academia at network level for each individual research trainee, which continues to be monitored after his/her degree via Alumni Organisation.

Quality Evaluation Board

at each collaborative doctorate according to own institution's rules

multilevel evaluation process by:

- Network Quality Board
- Coordinating Institution Doctoral Committee
- Independent Evaluation Committee

The SoReCom Joint-IDP institutional network

Structured into transnational teams by common research area and complementary multi-methodological approaches, this SoReComJointIDP guarantees a well-tested training structure including:

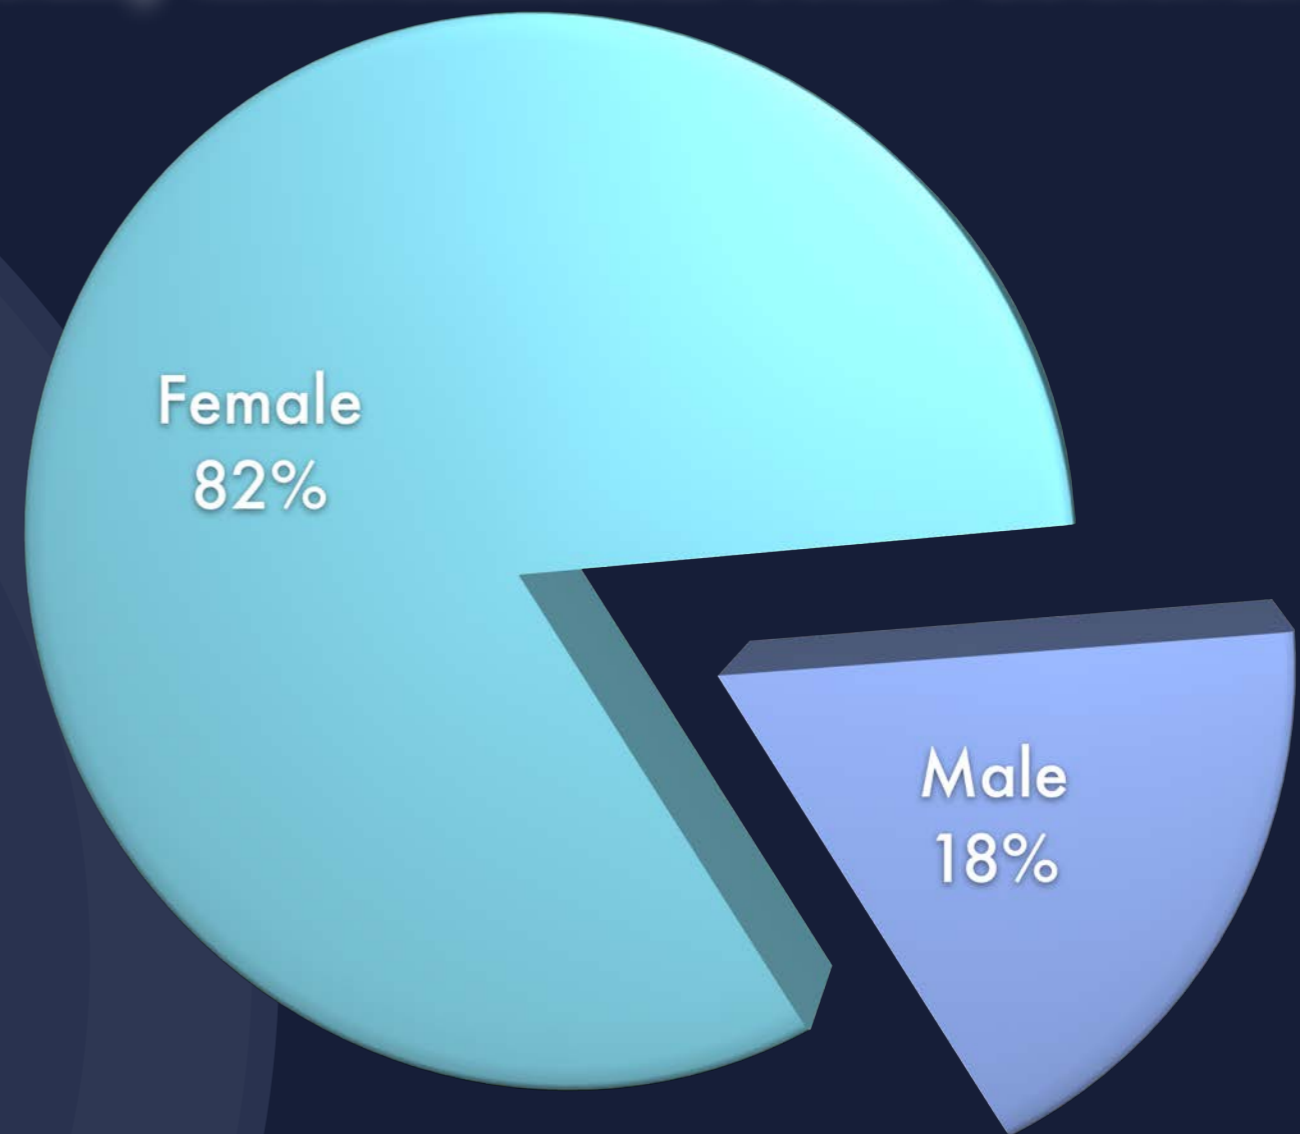

So.Re.Com. Joint IDP

AIMS

- **an innovative integrated physical and virtual campus, where world-class academic scientists, internationally recognised experts, experienced researchers and ESR cooperate face-to face and online "for" and "by" research**
- **multiple supervision via tutoring and co-tutoring by at least three tutors in different countries;**
- **individual mobility for ESR at research centres for secondments**
- **collective international mobility of trainees and teaching staff during International Summer Schools and Lab meetings**
- **learning by doing (including transferable skills) in academic and non-academic settings;**
- **worldwide access to common web platform, as tool for documentation, networking, training and monitoring trainees' progress**
- **quality evaluation system**
- **officialisation of the joint degree**
- **active integration in the world-wide SoReCom THEMatic NETwork**
- **enhancement of career prospects both in and outside academia**

European Credit Transfer System (ECTS) adopted by the Euro PhD on Social Representations and Communication

Due to the integrated and joint nature of the programme, the adoption of **European Credit System** has been specifically designed as a system for credit accumulation, rather than a comparison of distributed teaching offers and transfer of learning outcomes. By conceptualizing the academic year not exclusively in terms of time, but in terms of earned credits, the system allows for flexibly meeting the needs of full-time and part-time research trainees.

In line with the policy recommended by EU DG-Education and Culture, the European Ph.D. adopted the European Credit Transfer System (ECTS) as an instrument for creating transparency and confidence in academic performance.

Research trainees are awarded up to 60 credits per year (20 for courses and didactic activities and 40 for research quality and related bibliographic knowledge).

The didactic structure within this overall strategy is highly innovative. As the system of **open distance learning** makes clear, European Ph.D. research trainees are involved in an interlocking system of **virtual and physical mobility** which allows for considerable **flexibility** in catering to research trainees' needs while at the same time guaranteeing individual **tutoring and interactive learning**:

E.C.T.S. system of credit FOR THE EURO PHD ON S.R. & C.

20 for courses and didactic activities	10 credits per year		international summer schools
	5 credits per year		seminars and courses
	5 credits per year		multi-media and distance interactive learning
40 for research each year =	30 credits per year		advanced research training
	10 credits per year		bibliographic knowledge

60 total credits in a year x 3 years = 180 total credits for complete curriculum

@-learning Kit

The complex package of multimedia tools to be developed and disseminated via Internet includes:

- **a full bibliographic inventory**
- **a meta-analyzed inventory**
- **an advanced search engine**
- **a specialized e-library in SR & C.**

Welcome to the pilot So.Re.Com. THE.NET. eLibrary

As a member, or potential new member of our So.Re.Com. THEmatic NETwork Virtual Community, we hope you share the ultimate goal of this e-library, which we envision as an open non-commercial virtual space that, from anywhere in Europe or in the world, not only will meet the needs of its users by providing free access to publications, but will also enable them to become content providers and improve the visibility of their scientific work, thus sharing it with all its potential readers. Article copyrights remain with the publisher, society or author(s). In the last case, authors simply agree to the hereunder Creative Commons License for Attribution-Noncommercial-No Derivative Works 3.0 Unported (for more information, please consult <http://creativecommons.org/licenses/by-nc-nd/3.0/>)

To access the application forms available on the website, you must first verify that your name is already found in the database. To do so:

- A. Insert your own e-mail address and click on Verify.
- B. If the system recognizes your e-mail address, you will receive a password that will permit you to register. You must check that all the information already entered is correct and update any information that may have changed (telephone number, address, list of publications on Social Representations, etc.) as well as any new fields that may have been added to the system (participation in new conferences or International Lab Meetings, etc.).
- C. If the system does not recognize your e-mail address, it will produce a new blank application form which you will have to complete from scratch.
- D. In both above mentioned cases, you are kindly invited to upload:
 - your list of publications specifically related to Social Representations, to improve the information about our work which may not be present in the SoReCom THEmatic NETWORK Full Bibliographic Inventory yet.
 - the published version of all your publications specifically related to Social Representations - chapters in book, articles, conference lectures and papers etc. - in pdf format (including the cover page of the book, journal or conference proceedings in which it was published), in order to make your work visible in the SoReCom THE.NET. eLib and to share it with all its potential readers.

Integrated PHYSICAL and VIRTUAL MOBILITY

NETWORK-TRAINING EVENTS

INTERNATIONAL SUMMER SCHOOLS

International Lab Meetings via Euro PhD web auditorium

Each session of the European Ph.D. International Lab Meetings includes two pilot tests before the events start aimed at verifying and assessing in advance the technical abilities of each participant. It provides two full days of basic and advanced training on the use of Marratech's programs. This includes an interactive test of the skills acquired by participants. Experience shows that after these sessions, participants, including senior professors unfamiliar with new technologies, are quickly able to actively participate in the event. Their presence visually, in text chat, their voices and videos and their interactive use of the *white-board* is warmly welcomed by all participants.

Indeed, the *white-board* allows interactive use not only among participants from in and outside the lab, but is highly functional for sharing applications and software. For example, this allows us for to hold advanced training sessions and collaborative learning on statistical packages by using data files provided by each participant. It is also interesting to use the *white-board's* share screen both for the participants' presentations (they start by locating themselves on the globe with an arrow and fill in whatever they believe best represents their identities) and for the collective evaluation of the event, by writing comments and suggestions on the shared screen.
